Please note that due to the weather conditions the route had to be shortened. The athletes were picked of the water in *Heeg* and transported by car to *Balk* to continue their tour. This cut out the infamous *Slotermeer* from the route, shortening the route by 11 kilometres. During the night the race was stopped for two hours and twenty minutes due to a heavy thunderstorm. This waiting period has already been deducted from the results presented. Given the extreme weather conditions we consider this edition of the non-stop the most extreme yet; a true Ultimate Challenge.
